

KYRELL O. SANTILLAN

09204861397

kyrell0602@gmail.com

Silay City, Negros Occidental

Career Objectives

Computer Science graduate with practical experience in full-stack web development, Python automation, and secure API design.

Technical Skills

Languages: Python, TypeScript, HTML/CSS, SQL

Frameworks: React.js, Next.js, FastAPI, Flask, Tailwind CSS, PyQt6

Tools & Cloud: AWS Lambda, Google Cloud Storage, Docker, GitHub Actions, FFmpeg, SQLite, PostgreSQL, Figma, Excel, Word

Education

Bachelor of Science in

Computer Science

STI West Negros University

20022-2026

Certificate & Seminar

Certifications: Foundations of User Experience(UX) Design (Google, June 2026) | Fundamentals of Cybersecurity (Google, Mar 2026) | Responsive Web Design (freeCodeCamp, Oct 2025)

Seminars: DevFest Bacolod (Nov 2025) | Cyber Ex Training (Oct 2025) | PSG ML & AI Workshop (Sept 2025) | ICT Collaboration: Joenbuk National Univ (July 2025) | Spring Valley Tech (July 2025)

Work Experience

Department of Trade and Industry (DTI)

Consumer Protection Unit Intern

- Developed core features for an integrated queue and inventory management system.
- Built responsive user interfaces and analytics dashboards using React.js and Tailwind CSS.
- Implemented real-time features by integrating WebSockets into the queue system and writing custom middleware proxies.
- Automated data processing by creating scripts to audit, clean, and merge multiple internal datasets.

Feb – Apr
2026

Projects

CLIENTECHO

Full-Stack Developer (Personal Project)

- Built backend API routes for a feedback tracking application
- Designed dynamic UI views to display user feedback in real time.

Aug 2026

IDEE-CLI

Python / Backend Developer (Personal Project)

- Built a lightweight Python command-line utility to run fast terminal commands and automate developer workflows.
- Built a lightweight command-line utility

July 2026

SENTINELVIEW

Frontend / Full-Stack Developer (Personal Project)

- Centralized monitoring dashboard
- Configured dynamic visual metrics and state-handling components

Jun 2026

YOUTUBE SHORTS AUTOMATION

Python & Full-Stack Developer (Personal Project)

- Engineered a serverless video rendering pipeline
- Built a dynamic media optimization module

Mar – Apr
2026

SPELLGATE (AI-POWERED KIOSK APP)

Python & Full-Stack Developer (Personal Project)

- Developed a Windows desktop application
- Architected an automated fallback system
- Designing a full-stack web dashboard integrated with Firebase Authentication

Dec 2025 –
Jan 2026

POLYCON – Consultation System

Assistant Programmer & UI/UX Designer (Thesis)

- Co-developed the React.js frontend codebase
- Architecting reusable components and implementing responsive designs
- Connected the React frontend to a Flask backend API to fetch and display transcription data.

Nov 2024 –
Jan 2026
